

## Ultra Pure Water for Absolute Confidence in Your Results

The PURELAB Ultra is ideal for critical applications such as ultra trace analysis, ICP-MS (Inductively Coupled Plasma Mass Spectrometry) and molecular techniques requiring the ultimate inorganic water purity. This system consistently delivers the highest level of ultra pure water which enables you to concentrate on obtaining accurate results.

### Features:

- 18.2 M $\Omega$ -cm, type I<sup>+</sup>,I water suitable for critical applications
- PureSure system guarantees your water purity to 18.2 M $\Omega$ -cm and beyond
- Delivers up to 2 liters per minute of Type I<sup>+</sup>,I water
- Full spectrum UV technology to control bacteria levels
- PureSure system ensures that your work is not interrupted
- Real time TOC monitoring reports on TOC every 2 seconds
- Full service and validation support
